

## Mobile phone related illnesses on the rise

### Respect rights of those with environmental sensitivities\_

Linda Ewart was born in B.C. and has lived here all her life. As a retired elementary school teacher, she believes that every person has a basic human right to a safe living environment.

### Dangerous Meters

[http://www.ctvbc.ctv.ca/servlet/an/local/CTVNews/20120616/bc\\_mission\\_fire\\_120616/20120616/?hub=BritishColumbiaHome](http://www.ctvbc.ctv.ca/servlet/an/local/CTVNews/20120616/bc_mission_fire_120616/20120616/?hub=BritishColumbiaHome)

Are we starting to see the results of greedy policy at the expense of the safety of you in your own home?

Are we starting to see what happens when you send 900 000 000 Hz into wiring that is only compatible for 60 hz?

Are we starting to see the results of what happens when you also have up to 2000 other meters sending 900 000 000 hz signals into your wiring all day for life?

Are we going to start asking our local MP's Newspapers, Insurers, BC Hydro for answers?

Are we going to start to tell our neighbours and friends?

Are we going to start asking questions when the Zigbee chip is activated and we have 2 400 000 000 Hz and 900 000 000 Hz going into our wires at the same time, all day, every day, for life?

Are we going to figure out that maybe.... just maybe... this device, installed sometimes by 19 year old kids, who are not electricians, only concerned about piecework commission and rushing, installing hot, a non csa/ul approved device, with no third party testing, just hydro s 'word' (as if that holds water or ever did) that we are safe?

When we know it is just money talking as all the guys in Hydro have shares in Corix, the meter installers and have a MASSIVE CONFLICT OF INTEREST and ALOT OF MONEY TO BE MADE, and likely lawsuits, total loss of share value, so now, rather than admit they have put 1.8 MILLION houses at risk for money and ALL people who live in BC, they have to continue their lie or risk loss in their share prices in their original investments they made in 2008-10.

DO WE UNDERSTAND THEIR SHAREHOLDER VALUE IS MORE VALUABLE

THAN.....YOU, YOUR KIDS, YOUR FAMILY, YOUR LIFE ITSELF.

Would I be crazy to predict Hydro and the meter, will not be blamed, the homeowner will have to fend for themselves, and all people of BC will be at risk of fire all so a bunch of cronies can make a buck.

We have warned of this for months, not because we are psychic, because it is simple laws of electricity, physics and math, that have been ignored for money.

This is very real folks!

Brian

### **Chile becoming more democratic than most !**

BREATH TAKING: After debating this subject for a decade, the Government of Chile has passed the "Ley de Torres" or the Towers Act. The law, approved by a large majority of members of the Chilean Congress 1) strictly limits the power of antennas, 2) reduces urban impact of towers through 'infrastructure sharing', 3) opens up a process for citizen participation in the approval or denial process for new towers at the local level, effectively requiring prior permission, and terms, from local residents prior to receiving municipal permits; 4) allows property owners to request a reassessment of tax valuation for properties, and communities, where towers are located, to receive compensation from telecom providers in the form of improvement to neighborhood public spaces in an amount representing approximately 30% of tower installation costs; and 5) has a retroactive component in that it established mitigation measures in areas that are saturated with antennas, including those close to homes or institutions, such as kindergartens, health centers or schools. The Act has been signed into law by President Pinera and takes effect this week. Chile's Minister of Transportation and Telecommunications Pedro Pablo Kuczynski stated, "...in addition to protecting the urban landscape and the goodwill of the neighborhoods, the new law takes care of the most important: the health of people in a precautionary manner as recommended by the World Health Organization, setting strict limits on the powers of the antennas. Chile is setting standards in this regard." We will follow up with more details as we learn them.

The new law is **retroactive**, therefore, there will be a register to check the antennas meet current emission rates established radio now and will be required to undertake improvement works.

## **Intensive cell phone use affects young people's sleep**

“We looked at the effects both quantitatively and qualitatively and followed up the volunteers a year on,” explains Thomée, who will present the results in her upcoming thesis. “The conclusion is that intensive use of ICT can have an impact on mental health among young adults.”

## **Electromagnetic Fields and Leakage of the Blood Brain Barrier: Dr. Leif Salford**

Their results were consistent and worrisome: microwave radiation. . .caused the blood-brain barrier . . .to leak.” (It was repeated in 2003 on 32 additional animals; they waited this time 8 weeks before “sacrificing them”—and found “up to two percent of the neurons in all areas of the brain were shrunken and degenerated.”Dr. Salford, says Firstenberg, called the ”potential implications “terrifying.”

## **Smart meter anger in Frankston**

A SMART meter protest group has been formed following a packed public meeting in Frankston. Organisers were only expecting about 30 people to attend the meeting at the Frankston Mechanics Institute Hall, but 130 turned up to voice concerns over the state government's smart meter roll out.

## **Mobile phone related illnesses on the rise in UAE**

Dr Menon also adds that increasing use of SMS texting is also resulting in muscles between the fingers and the thumb getting wasted and a resulting groove

in the fingers, a problem similar to those faced by typists who constantly used the typewriter.
