PETITION TO THE GOVERNMENT OF CANADA

Whereas:

.

WE, THE UNDERSIGNED CALL ON THE GOVERNMENT OF CANADA TO:

- immediately revise Industry Canada Safety Code 6 to take into account accumulative biological effects, and health effects not just thermal effects, of microwave radiation, with a strict stated limit for exposure. Revisions must implement and enforce stricter limits to all new and existing cell towers, wireless, base stations, antennas, transmitters;

- immediately enforce a moratorium on all new installations on the roofs of apartment building or any residential dwellings of cellular and wireless antennas, transmitters, base stations across the country and especially in the GTA until further unbiased non-industry funded scientific research has examined the short-term and long-term biological effects and health effects on humans from immediate and accumulative exposure to microwave radiation emitted from said devices;

- ban all new antennas, base stations, and transmitters to be installed within 500 meters of any residence, school, community centre, hospital and the frequency of preexisting antennas must be immediately reduced to adhere to the precautionary principle as suggested in the *bioinitiative report* of 2007;

- consult all residents within a 500 meter radius well in advance to any installation of cell towers, base stations, antennas and transmitters so they can be informed of the biological health effects and have a say on the long-term implications of these devices in their immediate neighborhood and quality of life. Local councils must be allowed to make their own decisions about the tower sittings without being overruled; and

- call for immediate implementation of unbiased non-industry funded scientific research on the short-term and long-term biological and health effects of human exposure to microwave radiation, emf's and rf's, taking into account immediate and daily accumulative exposure, with full public disclosure of all findings.
