## **Woman Sues SDG&E Over Smart Meters**

### ***Susan Brinchman Says Company's Smart Meters Leads To Health Problems***

"We feel this is a form of extortion. If you don't pay, we're going to continue to harm you," said Brinchman.

Brinchman's lawsuit claims SDG&E's fees are illegal.

## **UK Cell Phone Protection Agency**

Has the HPA become a criminal organization? Have they been infiltrated by wrongdoers?

How can they simply ignore the World Health Organization class 2B carcinogen classification?

How can they ignore the masses of research which show that microwave radiation causes serious biological changes.

How dare they suggests that RF field exposure below guideline levels "does not cause symptoms in humans"?

### **Avella protests cluster of cell towers on office**

“Residents in the area have noticed an increase in cancer cases and other radiation-linked illnesses over the past 10 years that they believe are linked to the cell phone towers,” Avella said.

### **Dangerous New Cell Phone Frequencies**

The next spectrum up for auction is the 700 megahertz spectrum and bidding could be held late this year or early in 2013. It will have limits on the amount of spectrum any one wireless carrier can buy.

The spectrum has the ability to allow cellphone calls in elevators, deep in underground parking lots and in tunnels in big cities, and in basements and attics in suburban areas. It also provides better and more affordable coverage in rural Canada because fewer cellphone towers are needed to provide coverage.

## **Newspaper report from Burgundy, France**

Anne Cautain's parents who are in their 70's who have written an open letter about their EHS daughter living in a cave ...

<http://www.bienpublic.com/grand-dijon/2012/04/22/debat-sur-l-electrosensibilite>

## **Open letter Debate on electrosensitivity**

on 22/04/2012

Michelle and Robert Cautain: "We were participating, Tuesday, March 13, mayor of Dijon, the conference debate on electromagnetic fields, organized and moderated by Mr. Pribetich, Deputy Mayor of Dijon and physicist, specialist in waves. [...] So we, when we are in, exposed the case of our daughter Anne Cautain, electro hypersensitive surviving in a cave in the Hautes-Alpes. [...]"

As stressed by the speaker, we are faced with a choice of society. We have in our hands a new tool to good use, must be supervised and regulated. In short, we need a law. However, this technical progress leads to this mass consumption brings us to a real public health problem. [...]"

We call insistently to political power in the nation, for this primordial law and necessary. But not only! Because we believe local councils and the councils of the regions and departments should assume the political responsibilities which are theirs, about the health risks faced by their constituents. Of course, by a recent judgment (and circumstantial) we want to prohibit elected officials any intervention in this area, leaving the field open to all-powerful operators. Like us, these elected officials can be placed in terms of a struggle. Which may involve civil disobedience, and expose themselves to the rigors of the law. But should he not come to that because it is urgent. [...]"

## **Vancouver Smart Meters**

Vancouver city council is set to vote on a Smart Meter Moratorium, Even if you dont live there (but especially if you do) this is your chance to let them know you are against the meters... and all they are, do and represent.

The only thing worse than not having a voice is not speaking.

Their email contact is below, take 30 seconds to copy and paste, even just to say "I am against smart meters" or more.... or alot more.

If enough people do this, we can make a difference in the outcome of this vote and in the outcome of this entire fiasco.

Please plan on coming to the **Vancouver City Council** meeting Tuesday, **May 1 at 9:30 am**, carrying signs. The signs will be handed out before the meeting at 9.30 am so try to be at City Hall by 9- 9:15 am

or email: [mayorandcouncil@vancouver.ca](mailto:mayorandcouncil@vancouver.ca) (probably easier and faster) **on or before May 1<sup>st</sup>**. Keep them coming even after that date, but we want the bulk of the messages to be in by **May 1<sup>st</sup>**.

## **FIRES/INSURANCE/LIABILITY**

Again also, I cannot stress enough that you need to get on your insurers as to how they have let this device get on your home, or will do nothing against them putting it on

THE BIGGEST ISSUE HERE, in the end is not 'coverage'.... How do you cover for damaged lungs from smoke inhalation?

How do you 'cover' for burnt skin? loss of life, lost pets, heir looms etc?

You want to know you are SAFE in your home, and why they are doing nothing to keep you safe. Again, you are not concerned about their rhetoric of 'you are covered' because when the fire happens they will be looking at every way to make sure YOU were the problem, or worse they will blame Hydro, then Hydro will make YOU the problem.

UNDERSTAND CONTRACT WORKERS (not electricians) are installing a NON CSA/UL approved device onto your home

CSA/UL are/is the very testing that is to help you know you are safe.

So if you, or a friend have this on your/their home, there is risk of fire RIGHT NOW.

And yes it has been hydro, your government, ITRON that have made this happen, while you paid the money for them to use you as collateral damage for their profiteering schemes.

If you even put a lightbulb in that is not CSA approved your insurance is void INSTANTLY

If you have a meter on your house.... ARE YOU SAFE IN YOUR HOME RIGHT NOW..... NO YOU ARE NOT

Nor are the people in your apartment complex, building, rental units (Nor is the property itself)

If you get replies from your insurers, you can send them to me and I can phrase the questions out to reply to their responses
