

You Are Being Exposed --

To Electromagnetic Radiation (EMR)

The BioInitiative (pub. 8/31/07) puts together all of the peer-reviewed published studies on the non-thermal health effects due to emr.

www.bioinitiative.org

This report has led to the EPA's equivalents in Germany and the EU to issue warnings on exposure to wireless emissions.

"Radio frequencies emitted from mobile telephone towers will have deleterious medical effects to people within the near vicinity according to a large body of scientific literature. Babies and children will be particularly sensitive to the mutagenic and carcinogenic effects of the radio frequency radiation. It is therefore criminal to place one of these aerials on or near a school."

Helen Caldicott, MD, pediatrician and co-founder of Physicians for Social Responsibility

"The FCCs current exposure guidelines...are thermally based, and do not apply to chronic, non-thermal exposure situations... Therefore, the generalization that the guidelines protect human beings from harm by any or all mechanisms is not justified."

Norbert Hankin, of the Radiation Protection Division of the EPA, U.S.A.

Take Action!

Limit your exposure to wireless emissions -

- * Keep your cell phone off when not using it.
- * Use a wired headset. Keep cell phones at least 1 foot from your body when on.
- * Disable the wireless option on your computer.
- * Limit exposure at sites with wi-fi and cell towers.

Children under 16 should not be exposed at all. Brain tumors are now the leading cause of cancer death in the US in children under the age of 20.
